

Scotts Valley Water District

Grace Way Well- Well Head Pedestal and Pump Installation Project

Addendum #2

7/31/2025

RFI Questions and Answers:

1. Please provide a more descriptive scope on required electrical work to be completed:

SVWD Answer:

During the second mobilization of the project, the Contractor shall remove conduit box installed during the Grace Way Well Site Improvements project (performed by a separate contract) and finish conduit work around the well head and bring to the surface. Once this is completed, the Contractor will finish the connection points and run all low voltage and high voltage wiring at the well head back to the Motor Control Center Enclosure. This work will be performed while the MCC is not energized.

2. Is a C-57 license sufficient, or is a C-10 required for the electrical component of this work?

SVWD Answer:

A C-10 Electrical Contractor license is required for this electrical work. Bidders shall provide their or their subcontractors C-10 license number on Form 1-C (Bid Form) or Form 1-E (Subcontractors List), respectively.
