California is in its fourth year of below average rainfall. On January 17, 2014, Governor Jerry Brown issued a proclamation declaring a state of emergency in California due to severe drought conditions. On April 1, 2015, the Governor issued the fourth in a series of Executive Orders on actions necessary to address these severe drought conditions. The April 1 Executive Order requires, for the first time in the State’s history, mandatory conservation of potable urban water use. The restrictions apply to every person in the state, no matter where your water comes from. Based on the Executive Order, the following are not allowed:

- Using potable water to wash sidewalks and driveways;
- Allowing runoff when irrigating with potable water;
- Using hoses with no shutoff nozzles to wash cars;
- Using potable water in decorative water features that do not recirculate the water;
- Irrigating outdoors during and within 48 hours following measurable rainfall;
- Irrigation with potable water of ornamental turf on public street medians;
- Irrigation with potable water outside of newly constructed homes and buildings that is not in accordance with emergency regulations or other requirements established in the California Building Standards Code is prohibited.
- Restaurants serving water to their customers unless the customer requests it.

Additional drinking water restrictions also apply to residents of Santa Cruz County. To confirm the restrictions where you live, review your water agency’s page in this guidebook. If you are on a well or small water system, check the County’s restrictions.

Depending on where you live, the following may apply to you:

- Prohibition of any wasteful use of water
- Watering days
- Watering times
- Water rationing
- Plumbing fixture retrofit at time of resale

Check with your water agency or the County to determine what rules apply to you.

Welcome to the Water Conservation Guidebook for Santa Cruz County. This book was created by the Water Conservation Coalition, a partnership between all of the local Water Districts in Santa Cruz County, the County Water Resources Division, and Ecology Action. Santa Cruz County surface water and groundwater provide drinking water for residents and visitors, critical habitat to numerous threatened and endangered species, and opportunities for recreational and commercial activities. Like many other areas of California, the County faces water resource challenges including impaired water quality, inadequate water supply, overdrafted groundwater basins, depleted streams, and degraded riparian habitat.

The overwhelming majority of Santa Cruz's water supply is locally derived – a unique situation in a state supported by large federal and state water projects. Domestic supply within the Region is provided by eight public agencies, mutual water companies, and individual and shared wells and springs. The City of Santa Cruz, Live Oak, and parts of the North Coast rely on surface water from streams and reservoirs. The San Lorenzo Valley uses both surface and groundwater. From Capitola/Soquel South, as well as Scotts Valley, water supply is almost entirely reliant on groundwater resources. Approximately 55% of the human water use in the County is for residential uses, about 45% goes to agriculture which is concentrated in the South.

Even before the current drought began, surface water supply was barely sufficient to meet demand and many of our groundwater basins were in overdraft and at risk of saltwater intrusion. Ongoing water supply problems are aggravated by drought, and will not be resolved by a single storm or wet year. Changes in weather patterns threaten water resources into the future. Balancing water supply with environmental needs and other uses is a challenge that requires a collaborative effort. Since our domestic supply is local, we have both the opportunity and responsibility to find solutions to these challenges ourselves. Local water agencies are working toward long term solutions to ensure our water security, but using less water is one critical piece of the water supply puzzle.

DESIGN • INSTALLATION • MAINTENANCE
Population Served: 2,700

Water Source(s):
• 100% Groundwater
• Aromas Red Sands & Purisima Formations

We are a special district dedicated to delivering a clean, safe and reliable supply of water. Our mission is to serve the community in a manner that is courteous, efficient, cost effective, and sensitive to the natural environment.

Agency Restrictions
Currently, the following water restrictions apply to Central Water District customers:

• The application of potable water to outdoor landscapes in a manner that causes runoff
• The use of a hose that dispenses potable water to wash a motor vehicle, except where the hose is fitted with a shut off nozzle or device that shuts off the water when not in use
• The application of potable water to driveways and sidewalks
• The use of potable water in a fountain or other decorative water feature, except where the water is part of a recirculating system
• Irrigating outdoors during and within 48 hours following measurable rainfall
• Watering of outdoor landscaping shall be reduced to a maximum of two (2) days per week during approved watering hours

To report water leaks, please call 831.688.2767
For details in restrictions for residential, business, and irrigation accounts, please visit:

www.centralwaterdistrict.us.com

Services and Rebates Offered

• High Efficiency Toilet: $50 per toilet, limit 2 per household
• High Efficiency Clothes Washer: $50
• For more information on rebates, services, and programs provided, please contact us.

Voted BEST CAR WASH IN SANTA CRUZ!
Population Served: 95,000

Water Source(s):
95% San Lorenzo River & North Coast Streams
5% Groundwater from the Purisima Formation

Our mission is to ensure public health and safety by providing a clean, safe, and reliable supply of water. We strive to serve the community in a courteous, efficient, cost effective, and environmentally sustainable manner.

Agency Restrictions
In addition to statewide water restrictions, we are under a Stage 3 Water Shortage Emergency, which includes:

• Mandatory residential rationing
• Outdoor water restrictions for business and residential accounts
• Mandatory signage

For details in restrictions for residential, business, and irrigation accounts, please visit:
www.cityofsantacruz.com/drought

To report water waste, please call 831.420.LEAK (5325)

Services and Rebates Offered
To help you succeed at conserving water, the Santa Cruz Water Department offers FREE low-flow shower heads, sink aerators, hose nozzles, toilet leak detectors, shower timers, and home water audits.

Residential rebates:
• High efficiency toilets - Up to $150
• High efficiency clothes washer - Up to $100
• Lawn removal - $0.50 per square foot, with prior inspection
• Check into our Smart Business rebates, too!

For more information on rebates, services, and programs provided, please visit www.cityofsantacruz.com/drought or call 831-420-5230 or visit us M-F, 8:00-5:00 at 212 Locust Street
Thank you!
To All City of Santa Cruz
Water Department Customers

Your water conservation efforts have made Santa Cruz one of the top water-saving communities in California.

Thank you – keep up the good work!

5955 Soquel Drive ★ Soquel ★ (831) 462-2066
Corner of Park Avenue and Soquel Drive
Population Served:
28,000 people on small water systems or private wells, as well as environmental water users such as fish and wildlife

Water Source(s):
- Both surface and groundwater sources

The Water Resources Program is not a water supply agency, but rather works in collaboration with other departments, agencies, special districts, and non-profits to solve water resources and environmental issues through long-range water supply planning, water quality protection, and watershed management. We oversee small water systems and private well users.

Agency Restrictions
In addition to statewide water restrictions, the following rules apply for residents in the unincorporated County that are not served by a water district:

- No landscape irrigation between 10am-5pm unless by drip irrigation, or by hand watering with a quick acting positive shut off nozzle.
- Limit landscape irrigation to two days per week
- Retrofit toilets and showerheads with water efficient devices at time of property sale

To report water waste, call: (831) 454-3133

What can rural residents do to save water?

Outside
- Use mulch around trees and plants to retain moisture
- Remove overhead sprinkler systems and replace with drip or hand watering
- Make sure all your hoses have a shut off nozzle
- Install soil moisture meters to make sure you aren’t watering unnecessarily
- Use hay to supplement dry pastures
- Avoid any outdoor watering from 10am-5pm
- Collect rainwater for outdoor irrigation
- Consider washing your animals, including horses, less frequently

Inside
- Install efficient toilets, washing machines and shower heads
- Keep showers to 5 minutes or under
- Use buckets to collect warm up water
- Avoid flushing the toilet unnecessarily

Know your usage! Consider installing a meter on your well to tell you how much water you are using. Knowing your water usage can help you detect leaks quickly, saving your equipment from working too hard and keeping your energy bills down. It can also help you track your conservation progress to let you know if your efforts are working.

www.scceh.com
Hot tubs, when used to replace long showers and baths for relaxation, hydro-therapy or general wellness, save thousands of gallons of water a year. Using our state-of-the-art Freshwater sanitation system helps water last for up to one year before you need to drain your tub. Then, let it cool and recycle it into your garden.

Stop by for all the details and special pricing!

We have a wide range of Spas from $3495– $14,000
Protecting and preserving the water resources of the Pajaro Valley is crucial to supporting the local economy and maintaining the way of life enjoyed by local residents and businesses. PV Water is working tirelessly to develop, fund, and implement projects and programs that will do just that, ultimately stopping two major threats: groundwater overdraft and seawater intrusion. A key component of our water solutions strategy, The Basin Management Plan, is our drought tolerant Recycled Water Facility (RWF); the only operation of its kind in Santa Cruz County. The RWF provides a beneficial use for up to 4,000 acre-feet per year of recycled wastewater. Recycled water is blended with other supplies and used instead of groundwater for irrigation supply, which reduces coastal groundwater pumping – a key goal in stopping seawater intrusion. PV Water has recently received grant funding to help build a 1.5 million gallon storage tank making it possible to supply an additional 750 acre-feet of water per year by treating and storing night-time flows of wastewater into the City of Watsonville’s Wastewater Treatment Plant.

PV Water is providing resources to help interested people connect with technical experts, and learn about incentives to become more water efficient. At pvwater.org you can find water conservation toolkits designed specifically for households and for growers, in both English and Spanish. PV Water is funding an Irrigation Efficiency Program designed to provide farmers access to technical services and incentives for adoption of new efficient devices. For households our Laundry to Landscape program offers a $100 rebate to encourage the use of greywater as landscape irrigation supply.

With the recycled water facility, a managed aquifer recharge facility, and over 20 miles of conveyance pipeline in place, PV Water is now looking to put available surface water to beneficial use. The College Lake project would take water that is currently pumped from College Lake each year and flows unused into Monterey Bay and use it as a supplementary source of irrigation supply to further reduce groundwater pumping. This and other similar projects will make better use of available surface water supplies.

The PV Water staff is available to help answer your water questions. You may contact us via:

EMAIL: info@pvwater.org  PHONE: 831.722.9292

Lic. #916726
Population Served: 10,500

Water Source(s):
- 100% Groundwater (12% being recycled)
- Santa Margarita Groundwater Basin

To deliver a sustainable, high-quality water supply in an environmentally responsible and sound financial manner while providing outstanding customer service. SVWD is a public agency, serving 4,000 customers in and around the City of Scotts Valley.

Agency Restrictions

The District has adopted a revised Water Waste Policy that is in effect all year round, every year:

- **No spray irrigation** between 10am and 5pm.
- **No leaks, breaks or malfunctions** in plumbing or irrigation
- **No exterior washing of structures or decks** without a hose shut-off nozzle.
- **See** [www.svwd.org/be-water-efficient/water-waste](http://www.svwd.org/be-water-efficient/water-waste) **for the complete policy**

2015 Drought Emergency Regulations include the same watering days as our SLVWD neighbors:
- **Even-ending** street numbers water on Sat and Tue
- **Odd-ending** street numbers water on Sun and Wed

To report water waste:
- **ONLINE:** [http://svwd.org/be-water-efficient/water-waste](http://svwd.org/be-water-efficient/water-waste)
- **EMAIL:** conservation@svwd.com
- **PHONE:** 831.600.1907

Services and Rebates Offered

- **Turf Replacement** - $1 sq ft with pre-inspection
- **Spray Irrigation Retrofits** - $.50 sq ft with pre-inspection
- **Smart Irrigation Controllers** - Up to $100
- **Greywater Systems** - Up to $150 per fixture- laundry, etc.
- **Rain Catchment Systems** - $.50 per gallon of storage
- **Downspout Diversion** - $40 per downspout, for up to 2
- **Hardscape Replacement** - $1 per sq ft to replace concrete or asphalt
- **Toilets** (to replace only >1.6 gals per flush) - $100
- **Waterless Urinals** - $75
- **Free Water-Saving Devices** - Showerheads and more!
- **Waterwise House Calls** - [www.svwd.org/form/request-water-wise-house-call](http://www.svwd.org/form/request-water-wise-house-call)
The City of Scotts Valley started recycling water in May of 2002.

We have recycled over 340 million gallons of water since the plant started, and 61.3 million gallons in 2014 alone.

We are working to partner with other agencies and the SWRCB to add additional treatment processes to the recycled water plant that would take our water to a higher purification standard and allow it to be used to recharge the Scotts Valley, Mt. Hermon, and San Lorenzo Valley’s precious resource, our aquifers.
Population Served: 37,720

Water Source(s):
100% Groundwater
• Aromas Red Sands & Purisima Formations

We are a public agency dedicated to providing a safe, high quality, reliable, and sustainable water supply to meet our community’s present and future needs in an environmentally sensitive and economically responsible manner.

Agency Restrictions
In addition to statewide water restrictions, the District has implemented the following rules:

• No exterior washing of structures unless necessary to prepare for painting and a pressure washer is used.
• Only wash vehicles at a commercial car wash.
• No aesthetic uses of water such as fountains and ponds, except to support life.
• No sprinkler use between 10 a.m. and 8 p.m.

To report water waste:
EMAIL: savewater@soquelcreekwater.org
PHONE: 831.475.8501 x141

Services and Rebates Offered
Residential and Business Rebates are available for:
• Clothes Washers - $100
• Showerheads - Up to $25
• Greywater Systems - $150
• Hot Water Recirculation Systems - $150
• Toilets and Urinals - $100-175
• Rain Catchment Systems - $25-750
• Turf Replacement - 50% of materials cost up to $1 per sq. ft. (pre-assessment required)
• Drip Irrigation Retrofits - $20 per 100 sq. ft. converted (pre-assessment required)
• And many more!

Call 831.475.8501 x 146 for more information on rebates or to schedule a water-wise home visit. Our conservation professionals can help you identify simple actions that can result in significant water savings!

Since Earth Day 1970, Ecology Action has helped Santa Cruz County to take action to address the most pressing environmental challenges of the day. From establishing the County’s first recycling program to helping today’s business and residents respond to the drought and climate change, we offer the community practical pathways to make lasting changes that have big impacts.

We lead many regional coalition efforts that help you to:

- Set up greywater systems to reuse water in your landscape.
  - Sign up for the 1,000 System Challenge.
  - Find the greywater systems in your neighborhood.
  - Register your system on the map.
  - www.CentralCoastGreywater.org

- Make your landscape into a beautiful, low-water use outdoor living space.
  - Hire a Certified Green Gardener to help you with it.
  - Find templates for affordable designs with the right plants for your neighborhood.
  - Read about capturing rainwater for landscape use.
  - ....And stay tuned for updates this Fall showing rainwater systems for toilet flushing and laundry use.
  - www.Green-Gardener.org

- Tally how much water you can save when you Take the Pledge.
  - Find your water district on a County map.
  - Sign up for water conservation workshops and classes.
  - www.WaterSavingTips.org

Ecology Action believes that when we reduce our carbon emissions and water use, we build strong businesses, healthy communities and a sustainable future for all. To learn more please visit www.ecoact.org.

Passionate About Our Community and Saving Water?

WaterSavingTips.org is a Santa Cruz County-wide website that gives more than just tips about saving water.

Visit WaterSavingTips.org to:

• Take the online pledge to see how many gallons you can save!
• Share your story and see how your neighbors are helping out with the drought.
• Learn what indoor practices save the most water.
• See how water-wise landscapes and smart irrigation are big savers.
• Register for upcoming Workshops & Talks:
  • Laundry-to-Landscape
  • Lose Your Lawn

Top Three Tips:

1. Outside: Minimize or eliminate use of potable water on your landscaping
2. Indoors: Use water-efficient appliances and fixtures
3. Anytime you use water, make it a habit to not be wasteful.

Call your local water agency to order your “Doing Our Part To Save Water” yard sign!

WaterSavingTips.org is brought to you by the Water Conservation Coalition of Santa Cruz County: a partnership between all the local Water Districts in Santa Cruz County, the County Water Resources Division, Ecology Action, and other groups who share a passion for water conservation and public education. We share a common goal of protecting water resources in our aquifers and watersheds so that we can continue to provide safe, high quality drinking water to all who live, work, and play in Santa Cruz County.

RAIN BIRD’S
25 WAYS
TO SAVE 25%

25 Ways to Save Water.
One Source to Make It Happen.

For more information, visit 25ways.rainbird.com
An El Niño winter will not solve our water shortage problem.

Seawater intrusion is occurring. It will ruin our wells unless we stop it.

Our Community Water Plan will protect our groundwater and ensure our future water supply.
