## Rebate Program Terms and Procedures

- **PRE-& POST INSPECTION REQUIRED FOR:** lawn, spray irrigation, hardscape, greywater, rainwater and downspout diversion rebates. (Smart controllers only require post inspection.) Pre-inspections need to be done prior to starting of labor. We reserve the right to spot check any rebate installations.
- **Participants agree that all retrofits will stay in place for a minimum of five (5) years.**
- **SVWD reserves the right to deny application if purchases are made more than 90 days prior to submitting application. You may mail, fax, email an attachment or drop off to the SVWD. For rebates requiring pre- and post-inspections, post inspection must occur within 90 days of pre-inspection to assure funds are available. Rebates are not granted for amounts under \$10.**
- **Receipts:** Toilets, urinals, SMART controllers, cisterns and pressure regulators must be accompanied by a receipt with a model number. Rebate only applies to price of item- does not include accessories, parts, tax, shipping, labor, etc.
- **As of 2016, all rebates will be issued to account holders in the form of a mailed check, unless a prior request is made.**
- **Note that rebates are given to the account holder at the improvement site- whether it be an owner, tenant or property manager.**

-----

- **Toilet and Urinal** rebates, the model numbers for both tank and bowl must qualify. **SVWD only offer rebates to replace very old toilets that flushed more than 1.6 gallons.** Devices must be purchased new, EPA WaterSense certified and be **on our list of approved products**. Up to \$100 if toilet replaced is 1.28 gallons per flush (gpf) and up to \$125 if new toilets flush less than 1.28 gpf. Receipts are required.

- **Lawn Replacement:** Credit of \$1/sq ft of **replaced** irrigated lawn with low water use, or native plants or grasses and/or permeable landscape materials such as sheet mulch, decomposed granite, permeable pavers, or artificial turf. Existing spray irrigation in lawn area must be either a) converted to drip irrigation or b) have any valves that are no longer used in the irrigation system completely severed from the system and removed and c) have any non-functional sprinkler heads removed and glue-capped.

- **Low Volume Irrigation:** Credit of \$0.50 cents/sq ft for **replacing** existing sprinklers with low-volume irrigation, including drip, micro-spray, or low volume bubbler emitters to irrigate low water plants. Valves that are no longer used must be permanently disabled and existing sprinkler heads in landscaped areas must be removed and/or glue-capped. Drip and spray irrigation may not exist on the same valve for irrigation.

- **SMART Weather-Based Irrigation Controllers:** Credit of up to \$100 to **replace** old style controllers. Credits only offered for SMART controllers with on-site sensors. The District does not rebate those that are subscription-based or gather precipitation data by an off-site weather station or are simply a rain shut-off sensor.

- **Hardscape Replacement:** Credit of \$1/sq ft (not to exceed \$2,500) for **replacement** of impervious hardscape that discharges to storm drains, with low impact development (LID) infiltration methods such as rain gardens, dry creek beds, swales or infiltration basins. For more information see: [www.rcdsantacruz.org/media/brochures/pdf/HomeDrainageGuide](http://www.rcdsantacruz.org/media/brochures/pdf/HomeDrainageGuide). All removal and installation must comply with local building codes with permits as required, for rebates to be applied.

- **Downspout Re-Directs:** Credit of \$75 per downspout (limit to 4 downspouts) that are re-directed to a swale, dry creek bed, rain garden or other infiltration basin, or rainwater tank that overflows to a swale, dry creek, bed or rain garden or other infiltration basin.

- **Graywater Rebates:** Credit for materials of up to \$150 for each washer, shower, or tub. Installations must follow the current Greywater section of the California Universal Plumbing Code (UPC) and all local permitting and zone laws. See svwd.org for a copy of the code.

- **Rainwater Tanks, Cisterns or Barrels:** Rebates are for \$ 0.25 cents/gal of rainwater stored (maximum \$750 per account). Tanks cannot be connected to a potable water supply and installations must follow the current Rainwater section of the California Universal Plumbing Code (UPC) and all local permitting and zoning laws.

- **Pressure Regulators (PRVs):** \$50 credit for one regulator for the life of the account. A receipt for the regulator, as well as the photo or installation labor receipt from a licensed plumber, must be submitted with the rebate application.
